PERSONAL STATEMENT

Software Engineering student and junior full-stack developer with a strong foundation in building modern Front-End interfaces and secure Back-End systems. Combines practical full-stack project execution with deep analytical problem-solving skills. Seeking to leverage technical capabilities in building reliable, scalable software while collaborating within a high-performing engineering team.

EDUCATION

Addis Ababa Science and Technology University — **Addis Ababa, Ethiopia**
BSC in Software Engineering — Expected Graduation June 2028

Alx Ethiopia
Back-End Web Development with Django

PROJECTS

Hulurent

- Rental platform built with React and Node.js, enabling users to browse, list, and book rental items through a responsive, full-stack interface.

Planora

- A task management application built with Django, allows users to create accounts, secure their data, and easily manage their daily workflows.

Petify

- A pet shop web application built with a React frontend and a PHP backend. Features product catalog browsing with custom category filtering, shopping cart and checkout

SKILLS

- Programming: HTML, CSS, JavaScript, Tailwind CSS, React, SQL, C++, Python, Django, PHP, Java
- Problem Solving: Data Structures & Algorithms (DSA), LeetCode
- Software Engineering: System Design & Architecture, Requirements Engineering, Object-Oriented Programming (OOP)
- Languages: Amharic, English
